## DETAIL ACTION

### *Examiner's Amendment*

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as following:

In the specification, page 1, line 12 from line 1 starting at "BACKGROUND—Field of Invention", delete "fluoresce" and insert --fluorescence-- after "plane";

page 4, line 2, delete "6,156,402" and insert --6,157,402--; and

line 13, delete "6,138,132" and insert --6,128,132--.

In the claim, claim 1, line 24, delete "said" before "display end" and insert --a--;

line 1 of claims 2-9, 11, 12, 14-19, 21, 22 and 24, insert --, -- before "wherein"; and

line 1 of claims 10 and 20, insert --, -- before "further".

The above noted amendment has been added in order to correct a typographical error in the specification and provide a clarification in claim language.

### *Reasons For Allowance*

2. Claims 1-24 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record fails to disclose a simplify system and method as well for presenting a realistic three-dimensional display comprising a plurality bundles of image display elements having an input and a display output wherein display end of each image display element being placed at a distance from an observer corresponding to the depth of the component in corresponding scene represented by the bundle containing said image display element, such that said display outputs of said image display element of each bundle will be able to display its respective component of said scene at a

distance corresponding to its depth in said scene, whereby the display outputs of said plurality image display elements will display a true three-dimensional image of said scene, with closer parts of said scene physically closer to said observer and more distant parts of said scene more distant from said observer.

4. The remaining dependent claims are allowable for at least above reason.

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Sullivan (US Pat. 6,377,229) discloses a multiple planar volumetric display system and method of operation using three-dimensional anti-aliasing. None of cited/recorded prior arts stands alone or combination with others discloses all limitation required in claim invention.

### *Correspondence*

Any comments considered necessarily by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
